The INOGATE – ESIB Project and the use of market tools for Energy Efficiency in buildings

Jean-Jacques Dautet

Energy performance certification of buildings and energy labelling of appliances

Kiev, 18-19 January 2011
PURPOSE AND PLAN OF PRESENTATION

PURPOSE OF PRESENTATION:

- An introduction to the workshop

PLAN:

- Market tools as an essential component of an Energy Efficiency policy: Why, how, with whom?
- The topics addressed by the workshop
- The speakers
- Brief presentation of the ESIB project and work to come
Market tools as an essential component of an Energy Efficiency policy: Why, …

Energy consumption is the result of many decisions taken by many actors in consideration of many criteria (energy efficiency being only one of them)

Centralised decisions often poorly efficient (apart for some cases)

Most often, Energy Efficiency will result from the proper functioning of the energy use market, regulated by public authorities
Market tools as an essential component of an Energy Efficiency policy: How, ...

- A global approach involving all actors
- Continuity and progressivity over the years
- An in depth acquaintance with the market of energy use
- Ensuring full information of energy consumers
- Ensuring balanced power of the actors
Market tools as an essential component of an Energy Efficiency policy: With whom

- Public authorities
  - for defining tools (e.g. ministries)
  - For implementing and monitoring (e.g. local authorities)

- Main market actors
  - Consumers of energy
  - Suppliers of buildings and EE equipment and services

- Auxiliary actors
  - e.g. for dissemination of information, certificators, associations, institutes, etc.
The topics addressed by the workshop

- Certification of Energy Performance of buildings
  - Almost fully implemented in European Union; results to be assessed in next years

- Energy Efficiency labels of appliances
  - Very successful, significant results achieved in EU for some major appliances at practically no cost for the public budgets

- Achievements and projects in the ESIB Partner Countries

- Your inputs in the discussions
The speakers

- Juraj Krivosik and Petr Holub from SEVEEn, partner in the ESIB project, who have prepared the workshop

- The Ukrainian ministry in charge of Housing, co-organiser of the Ukrainian component of the workshop

- Representatives of EU, ministries in some Partner Countries and IEA

- Experts concretely involved in projects and in national actions for EE

- Private companies involved in the implementation of EE market tools
You, the participants

- Delegates of the ESIB Partner Countries
  - Mostly of ministries, but also local authorities, companies, NGOs, ...

- Ukrainian professionals and experts
  - From ministries, municipalities, technical bodies, associations, international cooperation projects and IFIs, ...
The ESIB project (1/2)

- INOGATE 11 countries project; 01/2010 – 01/2014

- Fostering Energy Efficiency in buildings: all buildings (housing, public, commercial, etc.); existing buildings and new construction

- Dealing with all aspects: policy, awareness, laws and regulations, HOAs, financing, technical and professional

- Technical assistance: assessment and advising, dissemination of information, training, capacity building
The ESIB project (2/2)

- Work programme including regional (multi-countries) and national actions

- Next regional workshops planned:
  - Certificates of Energy Performance of buildings, and labelling of appliances (Kiev, 18-19 January 2011)
  - Methodologies for municipal heating strategies (March 2011)
  - Energy Efficiency in buildings (Almaty, June 2011)
  - Methodologies for national energy efficiency strategies (autumn 2011)

- Web site to be on line in Spring 2011
The workshop is now beginning ... 

With hope that the workshop will encourage and help you to continue or to start the definition and implementation of Energy Efficiency market tools

ESIB is at your disposal for cooperation:
