CENTRAL ASIA REGIONAL Program 2009

Sustainable Energy Programme for Central Asia: Renewable Energy Sources – Energy Efficiency (RES – EE)
OBJECTIVES

The overall objective is to contribute to the

• increased security, reliability and efficiency of energy supplies in the Central Asian countries

• improve the preconditions for regional integration of efficient and sustainable energy systems

• increased cooperation with EU countries.
PURPOSE OF THIS PROJECT

• To assist in the set-up of the necessary policy, regulatory and institutional mechanisms enabling the penetration of renewable energy sources in the energy mix of the partner countries

• increasing the energy efficiency at national level (as measured by the energy intensity of the national economies),

• introduction of new, efficient and ecologically safe power plants enabled by the development of renewable energy sources for electricity generation in accordance with each country priorities.
RESULTS (1)

• The partner countries have defined appropriate policies for the development of renewable energy sources and the improvement of energy efficiency;

• Priority sectors for energy efficiency improvements and renewable energy are identified and support instruments for their development are designed and implemented by the partner countries;
RESULTS (2)

• Communities in the partner countries have improved access to energy resources as a result of alternative and sustainable energy-generating capacities and a more efficient use of existing capacities and networks;

• Central Asian countries have drawn on European expertise in their EE and RES policy development and implementation.

• Populations of Central Asian countries have improved their awareness about EE and RES issues.
Thank you
